Experience Summary

Provide technical leadership and guidance to project teams though out the project lifecycle. Familiar with Integration technology tools to perform ETTL activities like Boomi, mulesoft and OCI. Part of an Architectural Review Board, that actively evaluated business software and integration requests. Established requirements for Architectural evaluation and approval on EA Team.

Performed confluence & Jira administration, I am an actively certified Enterprise Architect and Agile SCRUM Master.

Partnered with architecture review board team members and business analysts to optimize end user's satisfaction (retrospectives) while writing modernization guard rails for our Planning organization. Populated the Service NOW   knowledge repository with documents I.E. "Transformation Guidelines", "Technical Debt now or later", "Github Onboarding Instructions", "Agile Process Flow Diagrams", "Standard Change Request Defined", "Types of Service Now Changes", "What is RACI? Explained", "Agile SCRUM Values", "IT Lifecycle management", "Demand Intake: what it is and what it means", "BigData and the seven V's".
   Implemented Architecture internal organization Office Hours, Lunch and Learn sessions, recorded videos, and posted to SNOW and Confluence. Worked with Security, Infrastructure and individuals from internal Plan, Deliver and Run organization to implement tools like Crowdstrike, SCCM, Zscaler, Cyberark. Collaborated to reduce software footprint, and better align internal Organizational Unit (OU) policies

    Experience with application security ARCHITECTUREs , Active directory and RBAC.

- Scoping and identifying: Publicly Accessible Applications (PAA)
- Publicly Accessible infrastructure (PAI)
- High Dollar Payment Applications (HDPA)
- High or critically rated applications based on application rating criteria
- Assets with a Recovery Time Objective (RTO) =0
- Service Oriented Control (SOC) designated applications.
- Sarbanes-Oxley Act (SOX) designated applications.
- R1/C1 and R2/C2 classified facilities.

Have Experience with security best practices, have implemented multi-factor authentication and OKTA and SSO. Partnered to implement Crowdstrike, Q-radar, CyberArk, SolarWinds, GitHub, Cloudamize. Collaborated with security teams to mitigate Penetration testing weaknesses. Time spent on coaching

and mentoring Experience explaining authentication and authorization and the significance of Effective Change Management to an organization evangelizing ITIL & CMDB.

Experience with batch processing tools and establishing centralized scheduling.

Augmented and assisted in Application Scope Disposition architectures of the six R's.

Retire, rehost, rewrite, Refactor, Replatform, Re-Architect

Experience decomposing monolithic applications into manageable microservices

Developed my own Transformation guidelines rules and published rules for Engineers to follow.

As an Automation manager, focused on ITIL CMDB automated discovery activities - Loads from monitoring tools like SCOM and SCCM - nice plugins with Relationships between CI's already established.

AWS Cloudamize, qradar, paloalto, solarwinds, splunk - reducing costs and overall software footprint and help determine TCO with tools like Trusted Advisor.

Experience with TOGAF and PMBOK - Lean IX and using Gartner magic quadrant for solutions.

Familiarity with dozen's of middleware application solutions, shell scripting, html, css and Apex, oracle, agile. Created guidelines for Architectural drawling using LucidCharts and have coached Business Architects on Requirements gathering and documenting using Business Requirements Documents (BRD's).

 Help setting up DR and internal policy and run teams to test Disaster Recovery Strategies. Cohesity architecture implementation experience.

Training, Certifications and Affiliations

- Enterprise Architecture Center of Excellence–Certi4ied Enterprise Architect. March   2023
- Certified in Cyber Security (ISC)2   2023
- Member of (ISC)2 Central Florida Chapter-Monthly Presentations on Security Trends   2022-2023
- Scrum Alliance   –   Certi4ied   Scrum Master (CSM   2021)
- Dell Boomi Classes – Developer1 Developer2, Architect 1,2,3, Administrator 1 Administrator 2
- AWS Solutions Architect, AWS Fundamentals, Understanding Cloud Architecture

- AWS fundamentals: Going Cloud Native
- AWS fundamentals: Migrating to the Cloud
- AWS fundamentals: Addressing Security Risks
- AWS fundamentals: Building Serverless Applications
- Hadoop Administra=on 1 -3 , Cloudera Data Scien=st, Sqoop
- Tableau User Group (TUG) member Charloie NC
- Crucial Conversa=ons Training, 17 Laws of Teamwork
- Agile Coaching Workshop, Agile Fundamentals, **JIRA**, IT Landscape
- Red Hat (RHCSA) Rapid Track RHEL 7.X Administration
- Oracle ERP Fundamentals, ERP Administration, Oracle DBA 1 -3, PL/SQL, Oracle Networking Admin, Oracle Reports, Oracle Developer, Oracle Apex, Oracle Virtual Manager, Oracle Enterprise Manager, Oracle SNMP, Oracle Symmetric Replica=on
- Certified Oracle Network Master
- Member of Charlotte Analytics Group Experience (CAGE)
- AWS fundamentals: Python
- Member/presenter Oracle Application User Group (OAUG) Atlanta
- Optimizing Boomi Deployments on AWS – Co-Presenter Las Vegas Nevada, Boomi World November 2018
- Oracle Applica=ons DBA Tuning – Presented in Atlanta GA OAUG 2002
- Oracle Master Award for Networking Specialist 1997
- 2015-2018 – Gold, Silver and Bronze Global Recognition Award recipient for: Implementing Sanity Testing

- Framework – Teamwork - Data Center Migra=on effort to simplify and improve technical stack.
- PADI Certified Diver
- Member of National Association of Realtors (BIC, SFR) 2002 - Present
- OAUG Atlanta customer support council advisory board member
- President, Board of Directors for Driftwood II Horizonal Property Regime II, 2017- 2018 Edisto, SC

Higher Education

Bowling Green State University, Bowling Green, Ohio. Bachelor of Science in Business Administration with Majors in Management Information Systems and International Business (Spanish)
Attended 3 years at Central Michigan University in their MBA Program (1994-1997 incomplete)
Attended University of North Carolina Charlotte in their MBA Program (2017 incomplete)

Titles of Documents written

ITSM things you need to know and understand.
Data Governance and ITSM
Onboarding to GitHub
Provisioning a new service account Metastore
Cleanup Procedures
Cluster to cluster data copy instructions. Sanity
Testing Framework

Generating and deploying SSL/TLS certificates
ARM vs. Access Management vs. Nexus
Autosys Overview
Control -M access necessary to schedule jobs
How to get IXP Access (Request Process) autosys
Autosys IXP and Command Line Interface (CLI) setup
How to create and backup outlook personal folders
Blade logic Information you should know

BladeLogic Report to show Access to Roles ACL
Change Management Peer Review Checklist
Server Decommissioning/Recommissioning
Server Unmapping from AIT's
Setting up HPDMA for Lines of Business
What is an SDLC how to get your projects to use it
Unix and Active Directory Groups Impala-Sentry
sanity testing procedures Subversion key information.
Cluster Installation/Build Reference (admin team)
Gateway checks before install/upgrade
Sanity Checks Scripts, post install or upgrade activities.

What IDE should we be using
certificates

Environment Management: Are my servers patched current
Key information when setting up elevated OU's How to decommission "turn off" MIPS monitoring (Steps to follow)
How to request Elevated OU system access
How to Clone - Duplicate an RFC in maximo/Remedy
How to setup MRD monitoring templates
How To use distributed copy to copy data to AWS S3
How to create a survey in sharepoint
How to unix enable an ID – change a unix password
    SiteMinder, LDAP and SSL

100 level items needed for new hires
